

The Benefits Add Up

SUPPORTING YOUR GREEN BOTTOM LINE

Environmental:

- Decreased water requirements
- Eliminate surface application of fertilizers and, thus odor
- Decreased chemical usage
- Reduced urbanization effects, including growing “heat shield” issues affecting weather/climate
- Reduced air & noise pollution
- Water conservation, by using diverted effluents in irrigation system
- Filtering and cleaning effluents through the EPIC system
- Reduced heat island effects, replacing pavement with green grass

Economic:

- Passive technology, with no water pressure maintenance or cost issues
- Conserving draw against existing resources
- Lower peak energy demand
- Lower maintenance costs
- Longer system life
- Sustainability – reduced dependence on outside sources of water
- More multi-use property
- Increased energy efficiency
- Integrated savings

SUPPORTING YOUR GREEN BOTTOM LINE

Functional:

- Simple, practical physics
- Multi-purpose surfaces and areas
- Exceptional drainage
- Erosion and dust control
- Reduced maintenance costs
- Fewer moving parts
- Increased safety
- Effluent management option
- Grey water repository without odor or disease

Image:

- Environmentally conscious
- Forward-thinking
- Public esteem
- Reduce, reuse, recycle
- Enhanced beauty
- Less chemical use
